About FTK-Centre for Information Technology

Established in 1984 as a Computer Centre with the objective of providing central computing facility to the students and staff of the University, it took more than fifteen years to transform it to a full-fledged Centre for Information Technology with the latest ICT facilities and services. Ever since its inception, the Centre has played pivotal role in developing and implementing IT services and applications in Jamia. To offer IT services to the end users in the University, it has established a campus-wide network of more than 2600 nodes. In addition, for easy access to applications and services, the CIT has setup a number of WiFi hotspots within the University Campus. The CIT is also responsible for development and implementation of University Management Information System. Presently, the University ERP consists of 18 modules and is being extensively used in the day-today activities of the University. In addition, the Centre manages the University website, University E-Mailing system and other useful Intranet services.

The Centre is continuously striving to bridge the gap between the IT and the end users for optimum utilization of the IT resources. To achieve this endeavor, it continuously arranges various IT training programs, extension lectures and workshops for its users.

To further this objective the FTK-Centre for Information Technology is organizing a one-day workshop on "Web 2.0 in Education" with the objective of promoting the collaborative learning model for the betterment of all learners.

Focus

During the past decade, the Internet has emerged as one of the greatest equalizer that the technology has ever produced for the mankind. It exposes its

users to probably the biggest mine of information and knowledge. In today's fast moving world, every progressive domain uses Internet for breaking conventional barriers of distance, time and cost. With added power of Web 2.0 the Internet has found its place beyond conventional applications of e-commerce and primary web-pages paradigms. The collaborative and engaging Web 2.0 applications have started emerging as significant influences for students' communities. Students have now started to rely on Internet for their learning needs. Education in the 21st century cannot afford to ignore these silent developments. Realizing this change, a number of leading educational institutions and also commercial establishments have already started making their educational material online for easy access for students' communities across the world. Certainly, this is a major milestone in modernization of education. However, it is just a beginning as plethora of challenges is still to be confronted. In a country of diversities such as ours, online quality educational contents can go a long way in meeting the national challenges of education, poverty and equity. The workshop on Web 2.0 in Education is aimed at enabling academicians and educational institutions to inculcate Web 2.0 techniques and tools in teaching and learning process and also to enable them to establish their e-presence through self-managed e-Content portals.

Topics/Areas

- Web 2.0 - The Interactive Web
- Blogging, Podcasting, Wikis and Social Bookmarking in Education
- Open Source E-Content development Tools
- Issues confronting E-Content Development
- Building Virtual Classrooms
- IT infrastructure for E-Content Management

The above listed areas are only indicative. Those interested may submit their papers on other topics also related to the theme of the workshop.

Submission of Papers

Participants desirous of presenting their work/case-studies pertinent to the theme of the workshop may submit the papers as per the following schedule:

Submission of Registration Form:	15th Oct. 2008
Submission of Abstract:	15th Oct. 2008
Notification of Acceptance:	18th Oct. 2008
Camera Ready Submission of full papers:	22nd Oct. 2008

Travel and Accommodation

It is expected that the participants shall arrange their travel expenses and make their own arrangement for stay in Delhi. However, the organizers may make arrangements for their accommodation in the University Guest House on first-come-first-serve basis, depending on its availability. Details about the room charges in the Nehru Guest House are available at <http://jmi.nic.in/universityguesthouse.htm>.
