

Topic: Educational Status of Kulhaiya Community: An Ethnographic Study

Name of the Research Scholar: Tanweer Alam

Supervisor Name: Prof.Kartar Singh

Department Name: IASE (Faculty of Education), Jamia Millia Islamia, New Delhi-25

Findings of the Study:

The study has found that there is lack of physical facilities as per the needs of schools. It is known that the availability of infrastructure facilities has considerable impact on school education. The Kosi river flood has negative impact on school education. It has been found that most schools are approachable by all roads, but a sizeable number of schools are yet to be connected by such road. The situation regarding availability of playground is far from satisfactory in the government schools. The research has found that various schools are devoid of electricity facility. The availability of electricity in schools plays a pivotal role in teaching and learning process. This research has found that the availability of library in the schools is not satisfactory. Many schools have no any library facilities. It has been found that most schools do not provide computer facility to their students. The research has found that many schools have computer labs but they are not in functioning mode. The Study found that the language and culture are regarded as prime barriers that Kulhaiya students experience during the school period. Financial problems are regarded as key barrier in acquisition of quality education.
