Sub: Permission to conduct Webinar for Final Year Students & Interns.

Dear Dr,

Colgate believes in & values the success of young Dental Professionals, thus initiating every program only to encourage & motivate the bright young minds to face the challenges of the professional world. Keeping this in mind, we have arranged a series of interactive & scientific **Webinar** sessions every month for your Interns & Final Year Students

Each lecture would be conducted by a highly renowned speaker on various dental subjects which will definitely help the young minds to excel in their Professional growth.

The details of this proposed session are enclosed with this letter. Should you have any queries, please do feel free to contact us and we would be happy to assist you.

Thanking you in anticipation of an affirmative response

Regards

Seema Amin

Webinar Invitation

Topic : Composite Adhesive
Dentistry

Synopsis: Dental adhesives and Composite resins have undergone great improvements necessitating a change in our clinical techniques. Techniques of applying dental adhesives have also undergone changes, which will be highlighted. You will learn what self-etching adhesives are, which consistently give good result and which do not, and finally how, where and when they should be used. Layering of composites using different opacities are important and so are the use of special instrument designed by the presenter and brushes which will allow you to place, shape and sculpt to duplicate the anatomy of the adjacent tooth. Use of tints and opaquers to duplicate adjacent natural teeth. Patients have become very demanding and discerning in getting their 'SMILE' to look their best. The presentation will teach you how to analyze a Smile using the golden proportions, how to choose an exact shade, how to do a mock up in actual composite, how to layer and sculpt and finally how to finish and polish a composite restoration to give that pleasing smile to the patient.
