

## Vision of the Department

To emerge as centre of excellence for education and research in civil engineering and to produce professionally competent and ethically sound engineers of global standards, ready to serve the community and the nation with dedication.

## Mission of the Department

- M1 To provide rigorous hands-on civil engineering education through learner centric teaching pedagogy.
- M2 Establish state-of-the art facilities for teaching and research in civil engineering domain.
- M3 Motivate students to develop low-cost and sustainable ethical solutions to problems faced by the society.
- M4 Provide opportunities to students to enable them to develop leadership and interpersonal skills.

## PROGRAM EDUCATIONAL OBJECTIVES

- PEO 1** The graduates shall demonstrate the ability to use professional skills including software tools and computational methodologies for the analysis, design, and management of infrastructure projects.
- PEO 2** The graduates shall practice high ethical values and effective communication skills so as to participate as a member of a multidisciplinary team working on various projects.
- PEO 3** The graduates shall continue lifelong learning and take up leadership roles in professional and entrepreneurial settings.

## MAPPING PEOs WITH MISSION OF THE DEPARTMENT

PEO Statement	M1	M2	M3	M4
PEO-1: The graduates shall demonstrate the ability to use professional skills including software tools and computational methodologies for the analysis, design, and management of infrastructure projects.	3	3	1	3
PEO 2: Graduates shall practice high ethical values and effective communication skills so as to participate as a member of a multidisciplinary team working on various projects.	1	1	3	3
PEO 3: The graduates shall continue lifelong learning and take up leadership roles in professional and entrepreneurial settings.	2	3	3	3
