JMI hosts International Seminar on Industry 4.0

The Department of Computer Science, Jamia Millia Islamia (JMI) successfully organized an international seminar on Industry 4.0, focusing on Artificial Intelligence, Cloud Computing, Big Data Analytics, and IoT in hybrid-mode. The event brought together leading academicians, researchers, and industry experts to discuss the rapid advancements in emerging technologies and their transformative impact on various sectors.

The seminar was inaugurated by Prof. Mazhar Asif, Vice Chancellor, JMI, who emphasized the university's dedication to fostering innovation and cutting-edge research. In his opening remarks, he highlighted how Industry 4.0 technologies are revolutionizing industries and academia, encouraging scholars to contribute to this evolving landscape.

The Guest of Honour & Keynote Speaker, Prof. K. K. Aggarwal, President of South Asian University, New Delhi, delivered an inspiring address on the future of Industry 4.0, emphasizing the significance of interdisciplinary collaboration and the role of artificial intelligence in the next industrial revolution.

Eminent keynote speaker Prof. Rajkumar Buyya, from the University of Melbourne and CEO of Manjrasoft Australia, provided deep insights into cloud computing and its critical role in Industry 4.0.

Prof. Latifur Khan, from the University of Texas, Dallas, USA, discussed the importance of big data analytics in decision-making and its far-reaching applications.

Prof. Amita Dev, Former Vice Chancellor of IGDTUW, New Delhi, focused on artificial intelligence and machine learning, highlighting their impact on industries and workforce evolution.

Prof. Vinod Sharma, Director of Ramnagar Campus, University of Jammu, J&K, elaborated on the integration of IoT in smart cities and healthcare automation, emphasizing the potential for sustainable technological growth.

The seminar was convened by Prof. Mansaf Alam and organized under the leadership of Prof. Monica Mehrotra, Head of the Department of Computer Science, who ensured the event's success. Several esteemed faculty members were also present during the seminar. Their participation and insights further enriched the discussions, fostering an engaging exchange of ideas.

The program concluded with a Vote of Thanks delivered by Prof. Mansaf Alam, who expressed gratitude to all the distinguished speakers, faculty members, participants, and organizers for their invaluable contributions in making the seminar a grand success. He emphasized the importance of continued collaboration and research in Industry 4.0 technologies to drive innovation and development.
