Press Release

JMI Architecture Students' Work on Kath-Kuni in the Limelight at Bharat Parv

The second-year B.Arch students from the Faculty of Architecture & Ekistics, Jamia Millia Islamia (JMI) have earned a prestigious centre-stage display at the Council of Architecture pavilion during the ongoing Bharat Parv celebration at the Red Fort, Delhi. Their comprehensive study on the Kath-Kuni architecture of the Bhimakali Temple, Sarahan has drawn much attention and excitement.

The project documents vernacular architecture in the Himachal regions of Sangla, Sarahan, and Chitkul, and focuses on the impact of local materials, climate, and cultural practices on the built environment. The students conducted in-depth studies of village layout, construction techniques, and architectural elements like roof types, doors, windows, and interiors. They also engaged with local communities, gathering insights into the cultural significance of traditional building practices.

Students were guided by Dr. Mohammad Saquib, Dr. Taiyaba Munawer, Dr. Arshad Ameen, Ar. Mohammad Amir Khan and Ar. Bushra Fatima. This achievement showcases the students' dedication and contributes to preserving India's architectural heritage for future generations.

This recognition is a proud moment for both students and faculty, celebrating their efforts to document and honour India's architectural heritage and representing JMI at the national platform of the Bharat Parv.

DAHOD SHARCHI - TIRTHAN VALLEY

Sharchi is a Gram Panchayat in Banjar Taluk of the Kullu District in Himachal Pradesh. Tucked in the Himalayas at about 7254 Ft, the village was not connected to a motorable road until a few years back and the only way to reach was by trekking.

BUILDING TYPOLOGIES

Customal open spaces in Sharchi are vital hubs of rural social life.
